

# [How to] MSI True Color Installation Guide

This guide only applies to True Color supported models.

## How to identify True Color Notebook?

Please check the specification under the Overview page of your Notebook model: <u>https://www.msi.com/Laptops</u>

If it is True Color supported, you can find True Color feature introduction under your Notebook model Overview page; if no such introduction exists, then the Notebook is none True Color series.

If you want to know True Color version update history, please refer to: [Release Notes] True Color

For other issues, please refer to: [Troubleshooting] True Color Troubleshooting Guide

## How to clean install True Color

For user who has common True Color error or fail to run True Color program, please uninstall old True Color program by Windows control panel, and install the latest version from "Utility" download page of your MSI Notebook model website.

#### 1. Uninstall True Color

If your system is not MSI preinstalled Windows, and it is the first time to install True Color, you can just refer to the step 3.

If your system is MSI preinstalled Windows and has bundled True Color program, please uninstall old version.

Here is how to find the settings in Windows 10.

Right click on Windows "Start" logo, click on "Control Panel" => Programs =>Uninstall a program, find True Color, and click "Uninstall".

### 2. Delete the hidden folder

- (1). Open File explorer.
- (2). Click on (C:).
- (3). Click on View.
- (4). Check the Hidden items to show all hidden files.
- (5). Click on "ProgramData".
- (6). Click on "Portrait Displays".
- (7). Delete the whole "TrueColor" folder in it.
