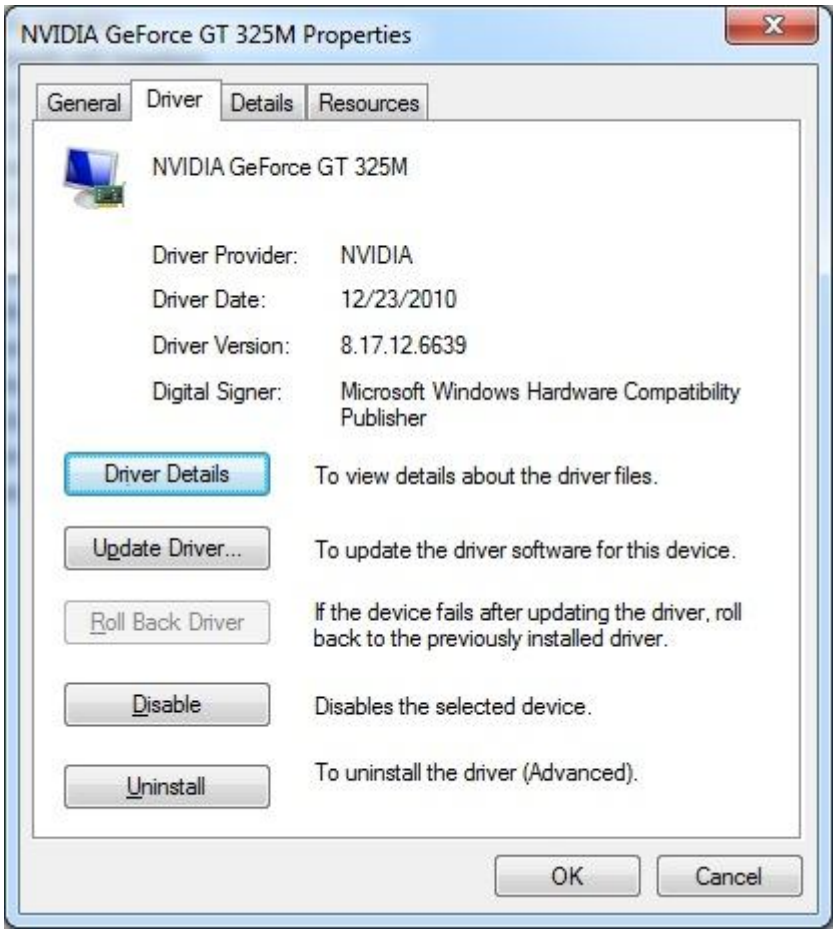
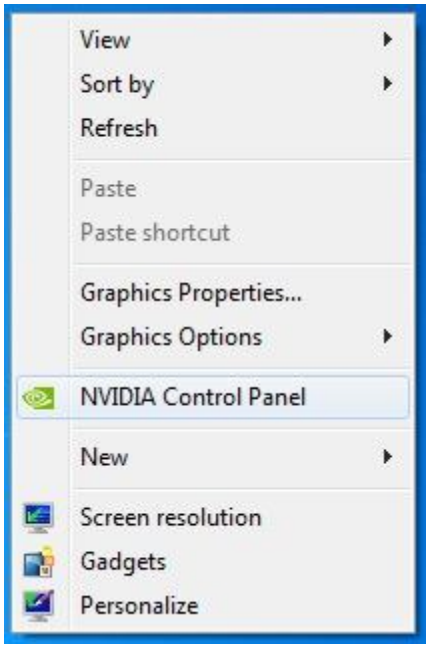
How to display GPU activity under Nvidia Optimus feature

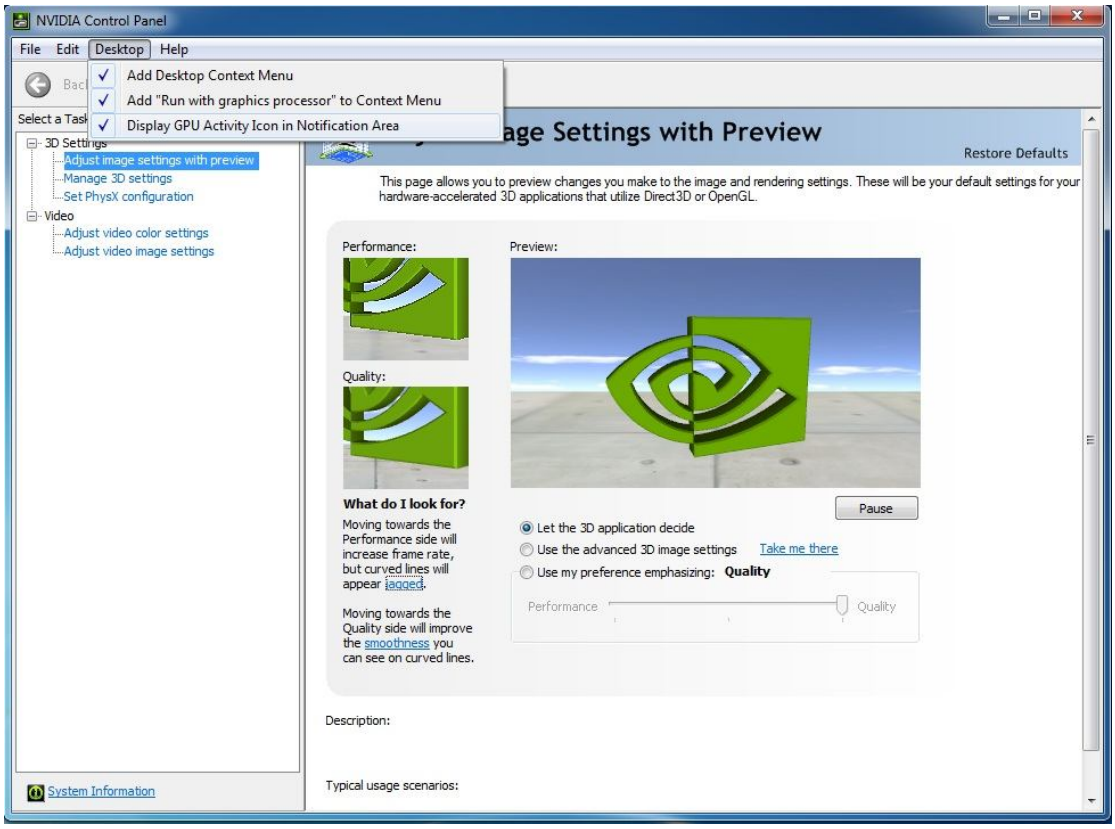
1. First of all, please install Nvidia driver later than 8.17.12.6639 for your MSI laptop.



2. Right click the mouse on the Windows desktop => left click on “NVIDIA Control Panel”.



3. Check the item of “Display GPU Activity Icon in Notification Area”



4. Click on the NV “GPU Activity Icon” on the tool bar. Then you could see what programs are occupying Nvidia GPU.
