How to delete D drive and extend C drive size in Windows 7?

1. Click on Start button and right lick on Computer and then select Manage on the menu.

2. Click on Disk Management in the left pane of the Computer Management Window. You should be able to see the allocation status of the disk partition.

P.S.1 Please be noticed that it is not recommended to delete Recovery Partition and Active partition or it may cause system crash or unable to do system recovery.

P.S.2 If you want to keep D drive and extend C drive size, you could use Shrink Volume to shrink D drive size and then extend the unallocated partition to C drive by using Extend Volume.
